Live Internet Webcast

This live webcast uses Mediasite technology to deliver streaming video, audio and visual aids (slides) synchronized as the presenter speaks. You will be able to watch the presentations through your Internet Explorer web browser.

System requirements include a computer with high speed connection (DSL or higher), speakers or headphones, Windows Media Player, and Microsoft Internet Explorer. Optional: connect your computer video output to a projector so that the presentation can be viewed by a large group.

For those viewing in a large group or who wish to test internet capabilities:
- Internet Explorer is the preferred browser
- Make sure that firewalls do not block video and/or audio. Ask your firewall administrator to ensure that these ports TCP/80 (http) and TCP/554 (rtsp) are open to mediasite1.sph.umich.edu.
- Test using this (archived) webcast: http://mediasite1.sph.umich.edu/mediasite/viewer/?peid=7d53e764-dcc2-4c3b-9c17-dabecd410e63

Trouble-Shooting
The audio and video in a Mediasite webcast is best viewed with Microsoft Internet Explorer which utilizes Microsoft Windows Media Player. (Often problems in viewing a presentation are resolved with updates to Windows Media Player, drivers or codecs.)

Streaming video and audio generally take 15 to 30 seconds to prepare to run if you have a fast Internet connection. Please be patient as Windows Media Player starts the video stream from our server to your computer. Audio sometimes begins 5 to 10 seconds before the video. Check that your headphones are plugged in or that your speakers are connected and turned on and adjust the volume as needed.

Help Desk:
Via email to kunnathj@umich.edu or call or call 734-615-6730; 734-615-9439. This webcast help desk is provided by the Michigan Public Health Training Center.

For the best presentation viewing experience:
- For Windows
  - Microsoft® Windows XP, Windows 2003 or Windows Vista
  - Internet Explorer 6.0 SP1 or later, Firefox® 2.0 or later, or Google™ Chrome 1.0
  - Windows Media® Player 9.0 or later
- Broadband Internet connection (256Kbps or more)

- For Macs
  - Mac OS X 10.4.8 or later
  - Safari™ 2.0.4 or later or Firefox 2.0 or later
  - Microsoft Silverlight 1.0 or later*

  *If Mediasite does not detect Silverlight on your Mac when viewing a presentation, you will be automatically prompted to install the plug-in. Silverlight only needs to be installed once and will then be available for watching any future Mediasite presentations.

- For Linux
  - SUSE Linux Enterprise Desktop 10, openSUSE 11.0 or later, Ubuntu 8.04, or Fedora Core 9
  - Firefox 2.0 or 3.0 depending on Linux operating system
  - Moonlight™ 1.0
  - Microsoft Media Pack for Moonlight
  - Broadband Internet connection (256Kbps or more)
